* Size ranges from 105mm to 4000mm, other specifications are available upon request.

Diamond Blades Packing:

Single diamond saw blade is packed by small box or plastic box separately, then 5pcs or 10pcs packed by hardboard carton or wooden case together. The customers are allowed to request the diamond blades to be packed by color boxes which has their LOGO and company information on it. ChinShine company aims at concise and easy packing, it is to let the customers have direct favorable impression on the appearance on the premise of satisfactory of quality.

Large size of diamond blades are packed by clad plate case, it is special wooden packing, fumigation is needless. The big diamond saw blade the quite heavy, generally, we export it in container by sea. ChinShine company manufactures big diamond saw blades professionally, its quality is stable, the cutting is smooth and the diamond segments are very sharp, time and cost is saved in cutting. The core blank of the cutting blade can be recycled more times than normal saw blades, customers are encouraged to [buy diamond segments](#) of corresponding specification to do welding locally, it is enviroental and economical. The biggest diamond saw blade we can produce is 4000mm/160inch. Mainly, the big cutting blades of ChinShine are used in stone cutting by bridge saw, multi saw blade and quarry saw blade, they can be used for concrete and wall cutting too.
